VBR gas turbine control system retrofits

What are the benefits of a VBR gas turbine control system retrofit?

- Fully open & accessible gas turbine control systems
- Multiple available choices for hardware & software
- Full factory testing with a tailor-made digital GT engine model
- Plug & play installation & commissioning onsite
- Integrated advanced predictive health monitoring capabilities
- Enables data driven condition based maintenance on GT engines
- Supports extension of service intervals and the total life of GT engines
- Very cost effective compared to OEM or other third party retrofit alternatives
- Supported by education & training for the onsite operation & maintenance staff
- Certified retrofit project management

To learn more about cost effective high quality GT control system retrofits & technical audits contact VBR at controls@vbr-turbinepartners.com or by phone +31 88 010 9050

VBR Turbine Partners main office & warehouse
Industrieweg Oost 6
6662 NE Elst (Gld)
The Netherlands

Independent ISO 9001/2015 certified O&M improvement experts for GE LM gas turbines and their control systems
VBR gas turbine control system references

Reference list VBR control system retrofits & projects

**Control system retrofit references**

**Offshore:**
- LM1600
- LM 1600 compressor drives
- LM2500
- LM 2500 compressor drives
- CPU and receiver upgrades with entirely new software

**Onshore:**
- LM1600
- LM 1600 generator drives
- LM2500
- LM 2500 generator drives

**Control system project references**

- Technical audits
  - LM 6000 PD engines (compressor & generator drive)
  - LM 2500 DLE engines (compressor & generator drive)
  (Technical audit: full in-depth assessment of all C&I related topics as jittering, grounding, earth faults, calibrations & mapping combined with a full in-depth assessment of the entire control system.)
- HMI upgrades on
  - LM 1600
  - LM 2500 SAC & DLE
  - LM 6000 PC & PD
- Software modifications on all type of engines and control systems
