Global Gas Turbine Services

LM6000 | LM2500 | LM1600

Parts & Tooling

VBR Turbine Partners provides critical OEM parts and tooling. We have over 50,000 parts in stock. As a Parker Meggitt-approved overhaul shop, VBR can repair its products in-house. We also provide LM2500(+) and LM6000 maintenance dollies, engine transport containers, lifting beams, hot section exchange tooling, and more. Our tooling is available for purchase or lease.

Field services

VBR is there for you when and where you need us. We can handle your scheduled maintenance, troubleshooting, C&I, and mechanical work. Our on-site services include borescope inspections, hot section exchanges, engine, LPT, HSPT changes, health checks, engine mapping, and semi-annual inspections.

Engineering

VBR has 25 years of experience fixing LM gas turbines. Our engineers have worked at GE and Woodward. We provide C&I and mechanical modifications such as performance optimization, control retrofit, HMI upgrades, root cause investigation, vibration analysis, and engine life extension.

Training

At VBR, we believe in the power of knowledge. That's why we offer a range of training services, including Familiarization, Borescope Inspections, and Advanced Controls training for SAC, DLE Gas Turbines, Speedtronic, and Woodward controls. We can also tailor a training session to meet your specific needs, right at your site.

Engine repair

At VBR, we offer more than just basic repairs. Our fully equipped maintenance and repair shop provides a wide range of services, including specialized hot section repairs, bearing changes, top casing, and comprehensive engine repair.
