Product VBR's Advanced Tooling System

Surface Treatment Multi-layer paint application, employing powder coating with 60-micron layers for enhanced durability and resistance to environmental elements.

Symbolic Color Utilizes Sapphire Blue, representing security, reliability, and safety, instilling user confidence in its performance and usage.

Design Enhancement Redesigned using Solidworks 3D technology, ensuring precision and optimization of tooling functionalities.

Production Standard Manufactured in Europe, adhering to stringent quality control measures and superior production standards.

Quality Assurance Rigorously tested and validated before shipment, guaranteeing optimal performance and reliability upon deployment.
